

	Solubility Test for detection and differentiation of Hemoglobin S
Application	For detection and differentiation of sickle cell hemoglobinopathies
Reagent	<ul style="list-style-type: none"> • Solubility Buffer - Phosphate buffer solution contains red cell lysing reagent with stabilizers and preservatives. • Solubility Reagent Powder - Sodium Dithionite
Test duration	10-15 minutes assay
Storage / Stability	2-30°C, 12 months
Inuse stability	Once reconstituted the working reagent (R1) is stable for <ul style="list-style-type: none"> • 1 month at 2-8°C • 3 days at 22°C-25°C

Presentation	Pack	Cat.No.
SICKLEVUE contains Reagents, reaction tubes and accessories	20 Tests	M-810020
